

Available in 2dB, 3dB, 4dB, 6dB and 9dB

Features:

- Enhances TV and broadband testing
- Balances signal for quality reception
- Fine-tunes cable network frequency
- Maximises signal integrity for entertainment

Wideband equalisers ensure that the signals travelling through the cables are balanced, resulting in high quality TV reception and fast, dependable internet speeds.

Specially crafted to fine-tune the frequency response of your cable network, these innovative devices ensure that every bit of data travels seamlessly across the spectrum. Whether you're streaming your favourite shows or gaming online, our wideband equalisers maximise signal integrity, minimising distortion for an immersive entertainment experience.
